
***Pre IBIG Forum Course – 9 October 2019,
University of Milan-Bicocca***

*Laboratorio 714, 1° Piano, Edificio U7, Via Bicocca degli Arcimboldi 8,
Milano*

***Theory and practice for the creation of summary tables
using ADaM domains***

Instructors: Valerio Romolini, Gabriele Di Domenico, Stefano Lombardi (GSK Vaccines)

Course description (h. 9.00 – 18.00):

1. Demographics & baseline characteristics: development of summary tables based on ADaM datasets (SAS code examples on ADSL flags creation and specs description)
2. Vaccine Efficacy using ADaM datasets (modeling using SAS code)
3. Safety tables using ADaM datasets (SAS code examples using the System Organ Class and Preferred Terms)
4. Wrap-up and Q&A

Pre-requisite: basic knowledge of SAS and CDISC standards (SDTM and ADaM).
