

IBIG Journal Club 2024

Topic	Speaker	Date	Time
Modern approaches for evaluating treatment effect heterogeneity from clinical trials and observational data Lipkovich et al., Modern approaches for evaluating treatment effect heterogeneity from clinical trials and observational data. <i>arXiv</i> (preprint) 2023	Ilya Lipkovich (Eli Lilly)	22 March	3:00–4:00 pm CET
Introduction to causal inference	Silvia Noirjean (GSK)	10 April	3:00–4:00 pm CEST
Investigating the impact of DMC recommendations on the probability of trial success	Luca Rondano (Politecnico of Turin)	26 June	3:00–4:00 pm CEST
Adding baskets to an ongoing basket trial with information borrowing: When do you benefit? Daniells et al. A comparison of Bayesian information borrowing methods in basket trials and a novel proposal of modified exchangeability-nonexchangeability method. <i>Statistics in Medicine</i> 2023	Libby Daniells (Lancaster University) and Pavel Mozgunov (University of Cambridge)	9 September	3:00–4:00 pm CEST
Simple approaches for portfolio quantitative decision-making Wiklund et al. Going beyond probability of success: Opportunities for statisticians to influence quantitative decision-making at the portfolio level. <i>Pharmaceutical Statistics</i> 2024	Gaëlle Saint-Hilary (Saryga, Politecnico of Turin)	16 October	3:00–4:00 pm CEST
Bayesian hierarchical modeling in interim futility analysis for two parallel clinical trials Li et al. <i>Statistics in Medicine</i> 2024	Veronica Sciannameo (Alira Health)	13 December	3:00–4:00 pm CET

► Cost of the webinar series (6 webinars) - **All webinars will be in English**

SIMeF members: €60

Non-SIMeF members: €120 + VAT
